

# Moving Beyond Exposure

ADDRESSING CLIMATE-RELATED RISKS IN INFORMAL COASTAL SETTLEMENTS

**26 February 2019**

**13:00–14:00 CET**

**Webinar**

Tackling disaster risk in informal settlements involves a nuanced understanding of exposure and vulnerability, as well as of people’s capacities to deal with an array of shocks and stressors—only some of which are linked to the environment and climate. Integrated and coherent policy solutions are needed that tackle not only hazard exposure, but also disaster vulnerability.

This webinar brings together two renowned experts to discuss disaster-induced displacement and resettlement and the associated risks people are facing in informal settlements. The speakers will illustrate the issues at stake through examples of resettlement policies that seem to have worked for people, in order to highlight the interlinkages between social development and disaster risk reduction.

Join the conversation with experts Bina Desai and David Dodman, who will share their insights and discuss policy pathways for reducing risk and vulnerability in informal settlements.
